

PHS Viewer

PHS Viewer provides one-click access to historical clinical data that may not be viewable elsewhere in Epic.

Overview

The screenshot shows the PHS Viewer interface. At the top, there's a header with navigation icons and the title 'PHS Viewer'. Below this, a patient selection area shows 'Claus, Santa N.' and '09995555 (BWH)' with a date '01/01'. A red warning message states: 'PHS Viewer is limited to historical data on or before 12/31/2017. *Complete Allergy history on or before 10/31/2019.' Below the warning, there are tabs for 'Lab Views', 'Summary Views: Big Board', 'LMR Views', 'Links', 'CMLV', 'Allergy History', 'OE / eMAR', 'Home', and '?'. A 'Submit' button is visible. The main area displays a table with columns for 'Chem', 'Imm', 'BBank', 'Path', 'OpRpt', 'Endosc', 'Note', and 'Scanned'. The table has rows for 'Hem', 'Micro', 'Rad', 'Card', 'Disch', 'Pulm', 'Neuro', and 'Flowsheet'. The patient name 'Claus, Santa N.' is listed in the first row of the table.

Clinical data in the Lab, Summary, Search, and LMR sections include results, reports, notes, and other clinical documentation through 12/31/2017.

The historical allergy record ends 10/31/2019.

Data for the MGH Orders, MGH eMAR, and DFPCC COE Orders views are from the legacy systems, and do not include any information from Epic.

For patient information created after the cutoff dates, check the Epic chart.

Information in Different Views

Results, reports, notes, and other clinical documentation views - through 12/31/2017

- Labs (including lab test trend)
- Big Board
- Summary
- Notes Viewer Links
- Links

LMR Views – Before implementation of Partners Epic eCare, the Longitudinal Medical Record (LMR) was used primarily by primary care physicians as a tool for documenting ambulatory patient visits.

Consolidated Medications List Viewer (CMLV) – Historical medications from LMR and OnCall, sorted by drug class.

Allergy History viewer – History of active and inactive allergies and reactions created for the patient in the Partners Enterprise Allergy Repository, up until the end date of 10/31/2019.

Chemo Order Entry (COE) Orders viewer - Historical chemotherapy order sessions for Dana-Farber Partners Cancer Care sites (DFPCC) at MGH, NSMC/IN, DFCI, and BWH/FH.

MGH Order Entry (POE) viewer - Historical order sessions written in the MGH Orders (POE) application in CAS, before the implementation of Partners eCare on April 1, 2016.

MGH eMAR viewer - This view displays historical medication administration documentation that was entered in the MGH eMAR application in CAS, before the implementation of Partners eCare on April 1, 2016.

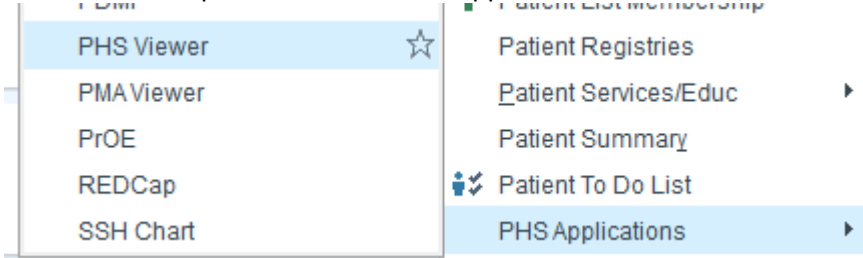

Access to PHS Viewer

PHS Viewer is available in Epic for all users with access to the Chart Review activity. To open the viewer:

1. Click the drop-down arrow in the upper right

2. Hold the mouse pointer over the PHS Applications menu item, and then click the PHS Viewer option:

As with all activities, PHS Viewer can be added to your Storyboard tabs for quick access.

Additional information and online help

For detailed information on the PHS Viewer data and displays, and instructions on accessing the historical patient information you need, click [?](#) in the menu to launch the online help. Help for the PHS Viewer includes contents to browse, an alphabetical index, and a search function to make it easy to get what you're looking for.

Help button in the menu:
