PHS Viewer changes for Static State

On January 28th, 2020, clinical data in the lab and summary views for the PHS Viewer in Epic will go to a static state. Available results and reports will be limited to those created on or before December 31st, 2017.

The table below lists PHS Viewer changes for static state.

View	Changes
Patient flags	All of the following patient flags have been removed: 🔍 Patient detail AMS Anticoagulant management PHM Population health management P Precautions Oncology protocols
Labs	• Limited to historical results created on or before 12/31/2017 • Test trend for single labs removed from all views • 90-day Blood Products report removed
Infectious Disease	• Removed from PHS Viewer; available from the Epic Chart > More > PHS Applications • Limited to historical microbiology data created for the patient in the CDR on or before 6/5/2019, as well as any Lab data for the patient that has been classed as Infectious Disease in the CDR in that time frame
All Labs	Removed
Lab Test Lookup	Removed
Last Known Values	Removed
Big Board	Checkmark replaces time elapsed for each available data type when clinical activity was created on or before 12/31/2017
Summary	• Limited to historical labs and reports created on or before 12/31/2017 • "Most recent" checkbox for end date removed • End date defaults to 12/31/2017; notification if later end date is entered
Notes Viewer	• Index of links, limited to historical notes created on or before 12/31/2017 • "Most recent " checkbox for end date removed • Checkbox added to display notes from Epic when needed • End date defaults to 12/31/2017; notification if later end date is entered
Search	Searches the content of notes created on or before 12/31/2017 for user-defined text; results include notes from the DR and LMR as well as operative reports and discharge summaries (no scanned or private/restricted notes)
Links	Scanned: Historical records scanned on or before Epic implementation for BWH inpatient, ED, and day surgery units, and for BWFH
	Retracted Documents limited to documents created on or before 12/31/2017
	MyView images: removed
	EKG images for enterprise and individual sites: removed
	Patient Reported Outcome Measures (PROMS) patient survey results; data is static, containing only pre-Epic data
	LMR oncology, OB summary, and patient pharmacy links: removed
	CDH Viewer: removed
CMLV	Limited to history of medications from LMR and OnCall, sorted by drug class
Home	Set the initial view on launch, and default behavior for some views in the PHS Viewer
